

Red-Poly Insulators 2" Diameter

PETTICOAT ADDS 1/8" TO
LEAKAGE DIATANCE

Red-Poly insulators feature a self-cleaning configuration. The wide range of sizes and shapes enables the electrical system designer to use standard insulators for almost any space problem encountered. A petticoat is available as an integral part of any insulator size listed. The petticoat, by providing a "Leakage Current Barrier", increases the creepage distance and wet-flashover value, and is desirable for applications under conditions of excessive moisture, air contamination, etc.
