

T-Connectors

FTK Tubing Run - 45° Tap

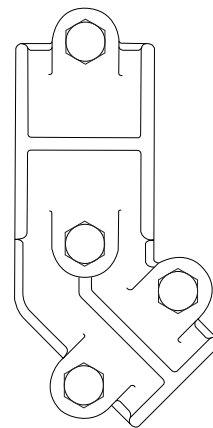

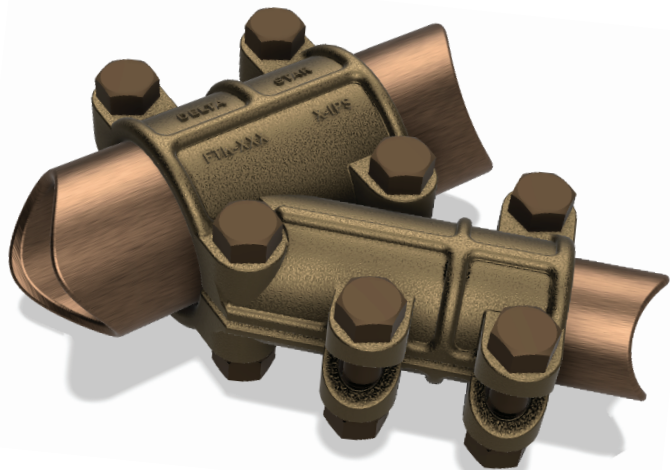

Fig 1

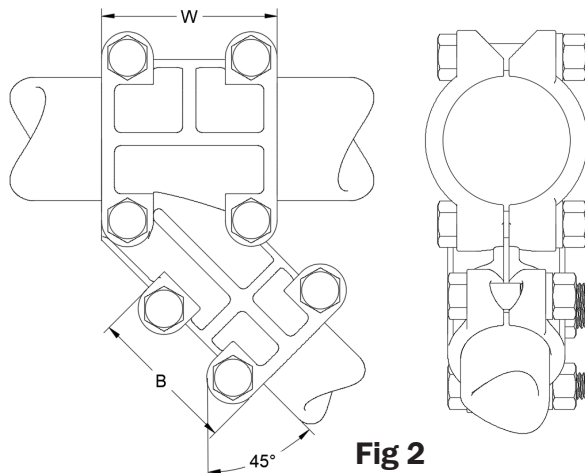

Fig 2

A handy connector for use as a brace for vertical runs. Provides additional rigidity to long tap-offs. Eliminates extra bus supports and other supporting members. It is usually used with type FTY brace connectors listed on page 10. It also is useful where a 45-degree tap, smaller than the run is required.

I.P.S. TUBING		CATALOG NUMBER	FIGURE NUMBER	DIMENSIONS IN INCHES		BOLT DIAMETER
